

## SPECIFICATIONS

C3

## COLOURS

Woofer / Tweeter: 4" / 1" silk dome  
 Recommended amplifier: 40-100 watt in 8 ohm  
 Sensitivity: 86 dB  
 Frequency response: 70 - 25 kHz  
 Nominal impedance: 8 ohm  
 Measurement (HxWxD): 371 x 174 x 124 mm  
 Weight: 2,7 kg

C4

## COLOURS

Woofer / Tweeter: 4" + 4" slave / 1" silk dome  
 Recommended amplifier: 50-120 watt in 8 ohm  
 Sensitivity: 86 dB  
 Frequency response: 64 - 25 kHz  
 Nominal impedance: 8 ohm  
 Measurement (HxWxD): 395 x 191 x 135 mm  
 Weight: 3,3 kg

C5

## COLOURS

Woofer / Tweeter: 5 1/4" + 5 1/4" slave / 1" silk dome  
 Recommended amplifier: 50-150 watt in 8 ohm  
 Sensitivity: 86 dB  
 Frequency response: 59 - 25 kHz  
 Nominal impedance: 8 ohm  
 Measurement (HxWxD): 439 x 213 x 154 mm  
 Weight: 4,1 kg

C6

## COLOURS

Woofer / Tweeter: 6 1/2" / 1" silk dome  
 Recommended amplifier: 100-200 watt in 8 ohm  
 Sensitivity: 90 dB  
 Frequency response: 70 - 25 kHz  
 Nominal impedance: 8 ohm  
 Measurement (HxWxD): 502 x 232 x 167 mm  
 Weight: 5,2 kg

C6TRM

## COLOURS

Woofer / Tweeter: 6 1/2" neo / 1" horn loaded  
 Recommended amplifier: 150-350 watt in 8 ohm  
 Sensitivity: 92 dB  
 Frequency response: 70 - 20 kHz  
 Nominal impedance: 8 ohm  
 Measurement (HxWxD): 502 x 232 x 167 mm  
 Weight: 5,9 kg

C8S

## COLOURS

Woofer / Tweeter: 8" + 8" slave  
 Recommended amplifier: 100-200 watt in 8 ohm  
 Sensitivity: 88dB  
 Frequency response: 34 - 240 Hz  
 Nominal impedance: 8 ohm  
 Measurement (HxWxD): 30 x 375 x 160 mm  
 Weight: 8 kg

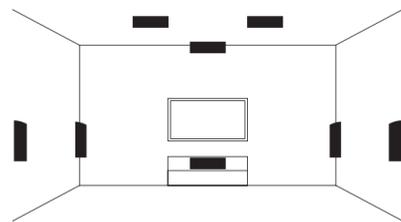

## Aesthetic sound

Based in Denmark, Cornered Audio is an agile and innovative manufacturer. Building on the proud Danish design tradition and world class acoustic knowhow. Cornered speakers are true professional installation speakers with great sound, uniform dispersion and excellent reliability.

## AESTHETIC SOUND

CORNERED speakers mount flush in corners or onto walls and ceilings. With a unique patented triangular design, they are true to the strong Danish design tradition; Less is more, no gimmicks, clean lines.

They are discreet and unobtrusive while offering audiophile sound quality with details, dynamics and sound pressures that defy their compact size.

### For Hi-Fi and Home Cinema

Cornered speakers are a great choice for a discreet two channel system in your home, but in addition to mounting in the corner, they can also be installed vertically or horizontally on walls and ceilings and as such they are especially suited for Home Cinema and Dolby Atmos installations.

With Cornered, it is possible to have a multi-channel Home Cinema system in your house, without making your living room look like a sound studio. As a special feature, two cabinets can be coupled together to operate as bi/di-pole speakers in home cinema application.

## QUALITY THAT PLEASURES THE EYE AND EAR

### Aluminum cabinets

Cornered speakers are made of extruded aluminium for a compact and elegant design, while at the same time cooling the drivers and minimising power compression.

All models are acoustically optimized for on-wall or corner position by compensating for the bass boost in the corner. As a bonus the sensitivity of the speaker is increased, which is why the output of our speakers will take you by surprise.

### Top quality drivers

The loudspeaker drivers represent the knowhow of more than 70 years of Danish acoustic engineering. With silk dome tweeters, the high frequencies are completely free of ringing and sound reproduction is clean and smooth with no listening fatigue.

The woofer baskets are designed to offer good cooling of the motor systems and with the added long-term cooling from the aluminium cabinet, the speakers will sound the same even when used at high volume for an extended period of time.

## COMBINED SYSTEMS

Our extensive range covers listening rooms from 15 sqm and up to very large listening rooms for which the C6TRM is ideally suited. For smaller Home Cinema systems, we recommend using C4 as front and centre speakers with the C3 as side/ATMOS and surround speakers. For medium sized rooms, use the C5 as front and centre speakers with C4/C3 as side/ATMOS/Surround speakers

For large home cinema systems, we recommend using the C6 as front and centre speakers with the C5 used as side/ATMOS and surround speakers and for very large systems, we recommend the C6TRM as front and centre channel, with the C6 as side/ATMOS and Surround channels.

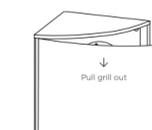

### On-wall subwoofer

The C8S is a passive shallow on-wall subwoofer using our reflective technology. The woofer mounts on the wall or stands on the floor, making it appear more discreet with the drivers being invisible and protected from the surroundings.

C8S features a built-in crossover allowing the top-boxes to be connected to the subwoofer. The woofer features a dual left, right channel voice coil and an 8" passive woofer which extends bass down to the true sub bass area below 35 Hz which will make your movies come alive.

## ELEGANT AND EASY MOUNTING

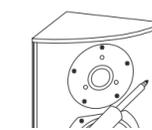

The patented design allows the speakers to be mounted flush without brackets. As such they can be discreetly placed in a variety of applications such as on-wall, on ceiling or of course in the corner, for a cleaner, more imaginative interior design. Mounting holes are integrated into the aluminium extrusion and the cable terminal is hidden behind the grille, making the design elegant both in horizontal and vertical installations.

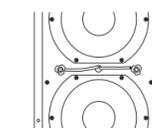

① Remove the front cover

② Run the speaker cable

③ Mounting the screws

④ Connecting speaker cables

With a discreet and compact design, Cornered speakers covers the entire room with great sound. With true audiophile sound quality and a clean aesthetic visual design, Cornered will please your ears and eyes for years.

## SPECIFICATIONS

Ci2

## COLOURS

Woofer/Tweeter: 2.5" / ¾"  
 Recommend Amplifier: 20-60 watt in 8 ohm  
 Sensitivity: 84dB  
 Frequency Response: 140-20,000 Hz  
 Nominal impedance: 8 ohm  
 Measurements (HxWxD): 181x135x102mm  
 Weight: 0,75 kg

Ci4

## COLOURS

Woofer/Tweeter: 4" / 1"  
 Recommend Amplifier: 30-80 watt in 8 ohm  
 Sensitivity: 86dB  
 Frequency Response: 60-20,000 Hz  
 Nominal impedance: 8 ohm  
 Measurements (HxWxD): 400x190x145mm  
 Weight: 2,2 kg

Ci5

## COLOURS

Woofer/Tweeter: 5 ¼" + 5 ¼" slave / 1"  
 Recommend Amplifier: 50-100 watt in 8 ohm  
 Sensitivity: 88dB  
 Frequency Response: 55-20,000 Hz  
 Nominal impedance: 8 ohm  
 Measurements (HxWxD): 450x209x150mm  
 Weight: 3,4 kg

C8S

## COLOURS

Woofer/Tweeter: 8" + 8" slave  
 Recommend Amplifier: 100-200 watt in 8 ohm  
 Sensitivity: 88dB  
 Frequency Response: 34 - 240 Hz  
 Nominal impedance: 8 ohm  
 Measurements (HxWxD): 540 x 375 x 160 mm  
 Weight: 8 kg

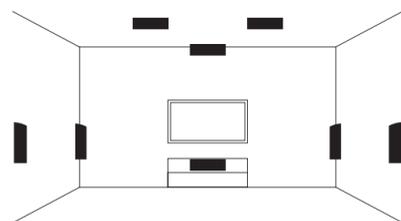

## Aesthetic sound

Based in Denmark, Cornered Audio is an agile and innovative manufacturer. Building on the proud Danish design tradition and world class acoustic knowhow. Cornered speakers are true professional installation speakers with great sound, uniform dispersion and excellent reliability.

## AESTHETIC SOUND

The Ci series are versatile and value packed speakers that mount flush in corners or onto walls and ceilings. With a unique patented triangular design, the Ci series is true to the strong Danish design tradition; Less is more, clean lines, no gimmicks.

From the very compact Ci2 to the top model Ci5, the Ci series is discreet and unobtrusive while offering great sound

### A speaker for any corner

With Cornered, it is possible to have a multi-channel Home Cinema system in your house, without making your living room look like a sound studio. As a special feature, two cabinets can be coupled together to operate as bi/di-pole speakers in Home Cinema applications.

### Small speakers, large sound

All Ci speakers are acoustically optimized for on-wall or corner position by compensating for the bass boost in the corner. An advantage of this design is, that the sensitivity of the speaker is increased, which is why the output of our speakers will take you by surprise. As a unique feature, the Ci4 and Ci5 features a protection circuit for the tweeter, so you can put your speakers in party mode and make sure they will take care of themselves all night.

### Combined systems

The Ci series covers listening rooms from 10 sqm and up to (even) large listening rooms for which the Ci5 is ideally suited.

For smaller Home Cinema systems, we recommend using Ci4 as front and centre speakers with the Ci2 as side and surround speakers.

For medium sized rooms, use the Ci5 as front and centre speakers with Ci4 as side and surround speakers.

### Versatile placement

In addition to mounting in the corner as two channel Hi-Fi speakers, the Ci series can also be installed vertically or horizontally on walls and ceilings and as such they are very well suited for Home Cinema installations.

## CI FEATURES

### Outdoor use

Designed for both in- and outdoor use, the Ci series is IP65 rated and will be reliable in even very rough environments with both cabinets and grills being UV and salt water tested.

### Top quality drivers

With silk dome tweeters, the high frequencies are completely free of ringing and sound reproduction is clean and smooth with no listening fatigue. The woofers are designed to offer good cooling of the motor systems and the speakers will deliver surprising dynamics, clearly defying their compact size.

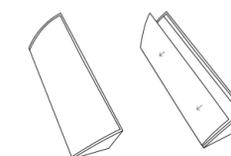

### C8S subwoofer

The C8S is a shallow on-wall subwoofer using our reflective technology. It mounts on-wall or stands on the floor and with the woofers hidden from sight, the subwoofer blends into any home environment. C8S features a built-in crossover allowing the top-boxes to be connected to the subwoofer. The woofer features a dual left, right channel voice coil and a 8" passive woofer which extends bass down to the true sub bass area below 35 Hz which will make your movies come alive.

## ELEGANT AND EASY MOUNTING

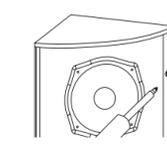

The patented design allows the speakers to be mounted flush without brackets. As such they can be discreetly placed in a variety of applications such as on-wall, on ceiling or of course in the corner, for a cleaner, more imaginative interior design. Mounting holes are integrated into the cabinet and the cable terminal is hidden behind the grille, making the cable connection invisible both in horizontal and vertical installations.

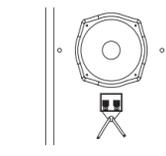

① Remove the front cover

② Run the speaker cable

③ Mounting the cabinet

④ Connect the speaker cable

With a discreet and compact design, Cornered speakers covers the entire room with great sound. With great sound quality and a clean aesthetic design, Cornered will please your ears and eyes for years.
